APPOINTMENT STANDARDIZATION

Objectives

- The right patient to the right provider in the right place at the right time
- Improve access for your patients
- Reduce patient confusion
- Fit the appointment to the patient, not the patient to the appointment
- Meet 1999 Defense Authorization Act access standards
- Resolve GAO concerns

APPOINTMENT STANDARDIZATION

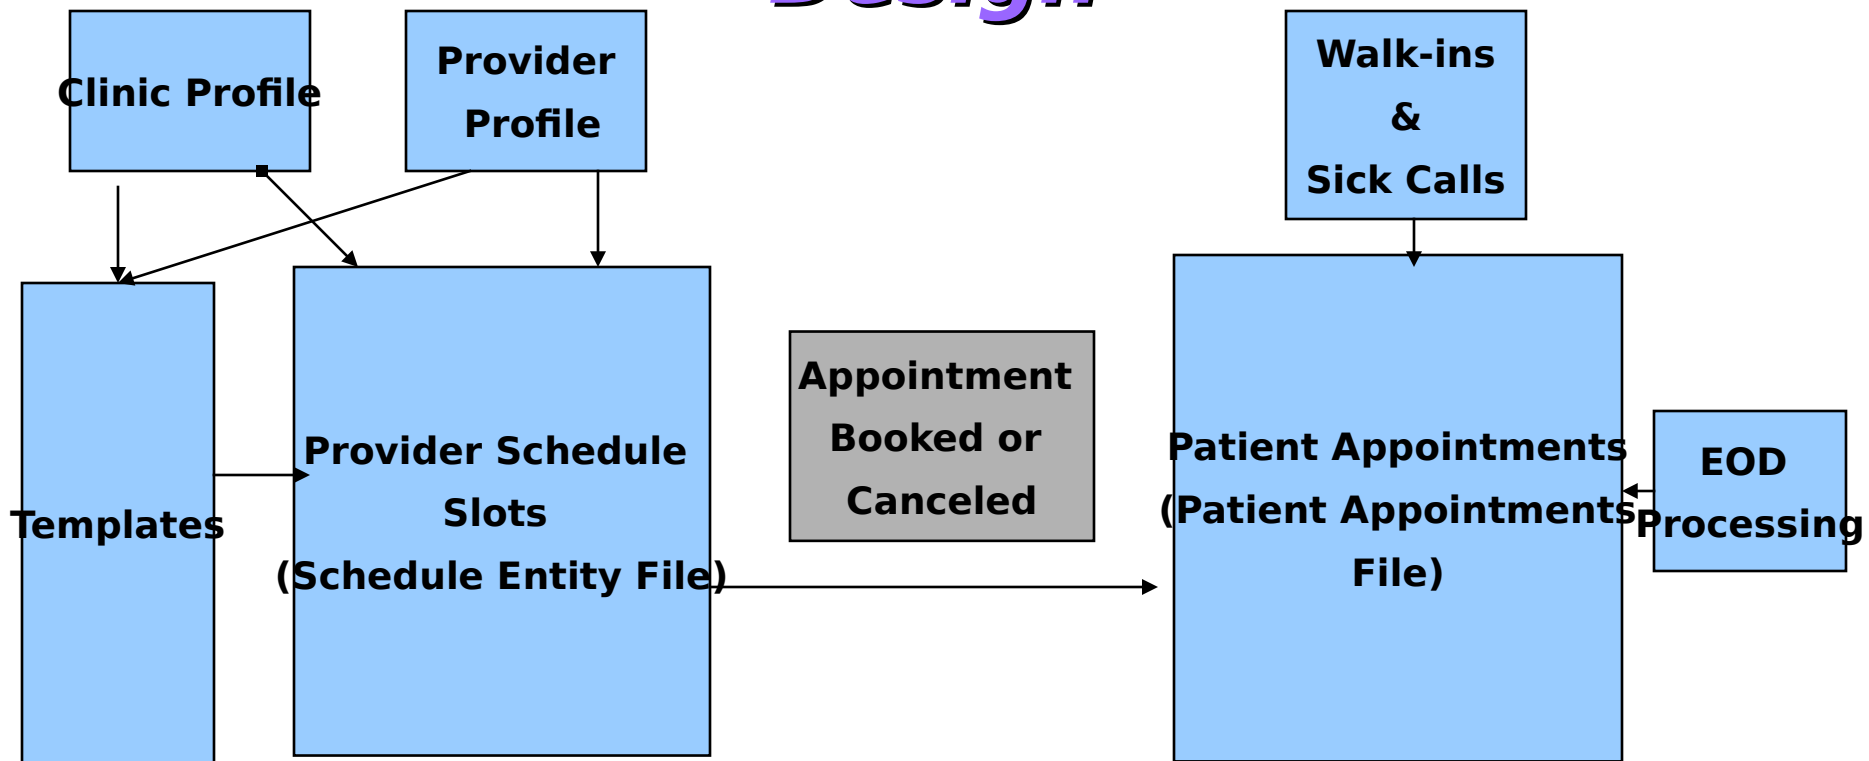

Objectives

- Implement one standard appointing system across the MHS and reduce training costs
- Provide information to clinics on their patient's access to care to help clinics improve access
- Provide sites with tools to improve schedule analysis and management
- Send fewer patients downtown
- Reduce TRICARE contract costs

APPOINTMENT STANDARDIZATION

Overview of CHCS Booking Design

APPOINTMENT STANDARDIZATION APS I - Template/Schedule Design

APPOINTMENT STANDARDIZATION

APS I - Overview of Booking

■ Files

- **Clinic Profile:** contains data and flags describing processing specific to that clinic including clinic specialties, clinic appointment types, workload type, and others
- **Provider Profile:** contains data describing processing specific to that provider within a clinic including appointment types, workload count indicators, provider specialties, and others
- **Templates:** Generic schedules for a provider within a clinic, usually for a day of the week. Used to build provider schedules that seldom change.

APPOINTMENT STANDARDIZATION

APS I - Overview of Booking

■ Files (continued)

- **Schedules:** A list of a provider's appointment slots that are available to be booked within a clinic. Includes the schedule slot status such as open, booked, frozen. Slots are marked when booked. Open slots may have been filled by walk-in or sick call appointments but will remain open.
- **Patient Appointments:** A list by patient of the appointments booked including the appointment status, i.e. kept, walk-in, cancel, admin, occ-svc, no show, lwobs, sick call, etc.
- A schedule slot becomes an appointment in the Patient Appointment file when it is booked to a patient.

APPOINTMENT STANDARDIZATION

APS I - Overview of Booking

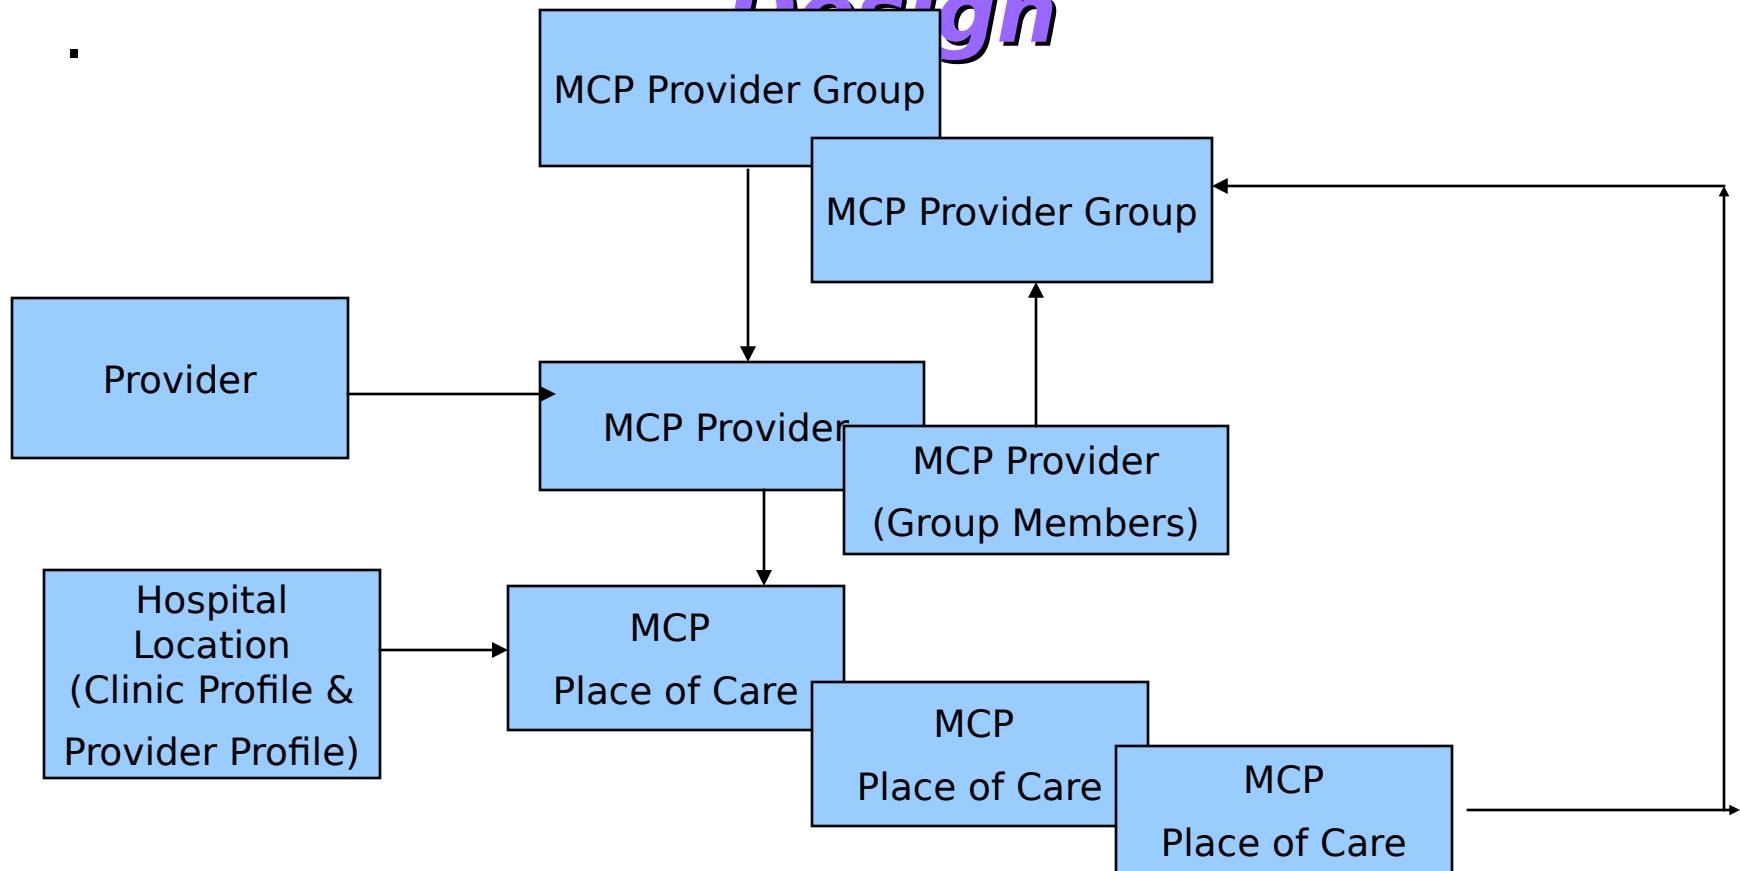

■ Files (continued)

- **Schedules:** A list of a provider's appointment slots that are available to be booked within a clinic. Includes the schedule slot status such as open, booked, frozen. Slots are marked when booked. Open slots may have been filled by walk-in or sick call appointments but will remain open.
- **Patient Appointments:** A list by patient of the appointments booked including the appointment status, i.e. kept, walk-in, cancel, admin, occ-svc, no show, lwoobs, sick call, etc.
- A schedule slot becomes an appointment in the Patient Appointment file when it is booked to a patient.

APPOINTMENT STANDARDIZATION APS I - MCP File and Table Design

APPOINTMENT STANDARDIZATION

The APS Phases

APPOINTMENT STANDARDIZATION Software Releases

- APS I released in November 2000
- APS II projected for release in October 2001
- Access To Care Summary Report alpha test in January - March 2001

APPOINTMENT STANDARDIZATION

APS I Tools

APPOINTMENT STANDARDIZATION

APS I - Review of Features

- Nine standard appointment types with nine MTF Book Only appointment types available, e.g., PCM, ACUT, ROUT, PCM\$, ACUT\$, ROUT\$
- MTF Book Only indicates that contractors should not book these appointments
- MTF Book Only appointment types (\$) may be used for one clinic, one division, or all divisions on a CHCS host
- Detail code table released for site review but not implemented

APPOINTMENT STANDARDIZATION

APS I - Review of Features

- MCP is implemented
- PAS becomes a secondary menu option.
Use is restricted to dental, ancillary,
and self-referral clinics (until APS II)
- Dental may also use Referral Booking.
- PAS Clerk Menu renamed the Clerk Front
Desk Functions Menu. Moved to MCP
Menu.

APPOINTMENT STANDARDIZATION

APS I - Review of Features

- **Short term solution:** A temporary version of each standard appointment type created to indicate non-count appointments until APS II is available. Uses the nine standard appointment types with an “X” extender, i.e., PCMX, ACUTX, ROUTX, etc.
- Add these to the Appointment Type File.
- Allows sites, particularly Patient Web-based appointing sites, to begin using the standard appointment types

APPOINTMENT STANDARDIZATION APS I - What Sites Can Implement Now

- Nine standard appointment types plus two versions of each appointment type with “&” and “X” extenders
- Use detail codes in the slot comment field, delimited with semicolons, e.g. BPAD;MA;17-65. The APS II Conversion will move up to 3 detail codes from the slot comment to the 3 new detail code fields.
- Access to Care Summary Report
- Convert 90% of all appointments by 1 October 2001

APPOINTMENT STANDARDIZATION

The APS II Tools

APPOINTMENT STANDARDIZATION

APS II - Overview of Features

- Detail code fields implemented to indicate special restrictions or resources required for an appointment including clinical resources, patient access codes, age, web access codes, readiness, and patient gender. Approximately 150 - 200 standard detail codes.
- Capability to define appointment duration, workload type, and up to 3 detail codes on each appointment slot when building Templates and Schedules

APPOINTMENT STANDARDIZATION

APS II - Overview of Features

- Clinic defines own clinic help lists for Detail Codes
- Capability to search on up to 3 Detail Codes
- Capability to reconfigure an appointment slot in order to book the patient into it. Clerk can change appointment types, detail codes, duration, and workload type. Capability is tied to two security keys, one for appointment types and detail codes and one for the workload type.

APPOINTMENT STANDARDIZATION APS II - New Functions

- The **Self-Referral Module** allows a patient to request an appointment at a specialty clinic without a referral. The clinic must be designated in CHCS as self-referral. Supports the federally mandated right of the patient to self-refer for certain types of clinical care.
- Capability to book **Operational Forces** beneficiaries to any PCM in any place of care within their home MTF. (Temporarily on hold awaiting policy formulation.)

APPOINTMENT STANDARDIZATION APS II - Reports

- Appointment Detail Code Schedule Utilization Report - Helps sites perform schedule planning analysis based on detail codes .
- Self-Referral Report - Lists the self-referrals issued by clinic.

APPOINTMENT STANDARDIZATION

How to Use the Tools

APPOINTMENT STANDARDIZATION APS II NEW CODES

- Standard Appointment Types
- Detail Codes
 - Clinical Resources/Procedures
 - Web Appointing Codes
 - Age Codes
 - Patient Gender Codes
 - Miscellaneous
 - Patient Access Types

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- **Nine standard appointment types**
 - **Primary Care Only**
 - » PCM 28 day access
 - » ROUT 7 day access
 - **Specialty Care Only**
 - » SPEC 28 day access
 - **Both Primary and Specialty Care**
 - » ACUT 24 hour access
 - » WELL 28 day access
 - » EST provider designated
 - » PROC 28 days/provider design
 - » GRP provider designated
 - » TCON N/A

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The PCM appointment type is designed for the initial primary care visit with the PCM to collect health data, family history, readiness data, and possibly HEAR data. A PCM visit may not be the patient's first visit to the PCM since an acute or routine appointment may precede a PCM visit. This appointment type should be used by sites to track whether the PCM has completed this initial visit required as a TRICARE benefit. This appointment type is not designed for use for acute or routine health care. The WELL appointment type should be used for the annual exam.

The initial PCM appointment will map to the 28-day Wellness ATC category.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The ROUT appointment type is designated for patients who require *an office visit with the PCM for a new health care problem that is not considered urgent*. Patients may be routed through Nurse Triage, if available... In those locations where Nurse Triage is not in place the concept of "prudent lay-person terminology" will be used in determining whether the patient should be given a routine or acute appointment. If the patient insists on an acute appointment, every effort will be made to book one within access standards using the "Order of Precedence for Appointments Search" business rule or approved local policy.

The ROUT appointments type will map to the 7-day Routine ATC category.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The SPEC appointment type is designed for the *initial appointment (by consult or referral) to a specialist*. A specialty appointment is reserved for care to be delivered by a network or MTF specialist for a specific disease process.

The initial specialty care appointment will map to the 28 day Specialty ATC category by default, unless a consultation between the referring provider and the specialist specifies that the visit to the specialist must occur sooner. The requirement for a specialist visit to occur sooner than 28 days will be documented on the electronic CHCS Consult Order or other applicable automated consult system.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The ACUT appointment type is designed for scheduling appointments for beneficiaries who have a need for *non-emergent, urgent care* typically delivered by an MTF or network provider. ACUT is synonymous with the intent of "Same Day " appointments. Before an ACUT appointment is scheduled appropriate nurse triage may occur to determine the most appropriate level of treatment for the patient's medical problem.

The acute appointment will map to the 24-hour Acute ATC category.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The WELL appointment type is designated for patients who require *preventive, health maintenance care* (e.g., periodic examinations, physical exams, check-ups, immunizations, screenings, PAP, or PPIP).

The WELL appointment type will map to the 28-day Wellness Access-To-Care standard.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The EST appointment type is designated for patients who request *appointments with the PCM other than for acute health care, initial PCM appointments, or wellness*. The EST appointments will also be used when a patient is being *scheduled for follow-up care from either a Specialist or for Primary Care*.

An established appointment should be scheduled with a provider per the initial provider's designation.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The PROC appointment type is designated for patients who are determined to be in need of *medical procedures other than those that are performed in the Ambulatory Procedure Unit (APU - B**5 MEPRS Clinics).*

Procedures performed in APUs will be considered Ambulatory Procedure Visits (APVs) and will be scheduled using the CHCS APV subsystem.

A procedure appointment should be scheduled with a provider within 28 days and in accordance with the referring provider's designated time.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The GRP (Group) appointment type will be used for patients who must be scheduled for *therapy, counseling, or teaching sessions where a provider will perform the intervention in a group setting*. The detail field can be used to provide further information to indicate the purpose of the group appointment type (e.g., NPCL for New Prenatal Class).

A group appointment should be scheduled per the referring provider's designation.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The TCON appointment type is used for Telephone Consults between the provider and a patient.

TCON appointment types will default to non-count unless the provider designates them as count consults.

TCON appointments have no access standard.

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- MTF or Clinic Book Only appointment types are the nine standard appointment types with a “\$” extender, i.e., PCM\$, ROUT\$, WELL\$, etc.
- Non-Count Appointment Types are the nine standard appointment types with an “X” extender, e.g., PCMX, ROUTX, SPECX. These codes are a short term solution to be used only prior to APS II.
 - » Always set the Workload Type in the Clinic and Provider Profiles to non-count
 - » An appointment assigned one of these appointment types will have a non-count workload value by default

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- Other appointment types currently used by CHCS for special processing will be supported as standard appointment types
 - APV (Ambulatory Procedure Visit. This appointment type is used for outpatient same day surgery visits in all clinics with a location type of S for same day surgery.)
 - EROOM (The Emergency Room may use EROOM or any standard appointment type.)

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- N-MTF (A downtown appointment logged into CHCS. This appointment type must be added to the Non-MTF Place of Care's (Clinic) profile and to the individual provider profiles for each provider linked to that non-MTF place of care. When a HCF logs a non-MTF appointment, the system will automatically populate the appointment type field with the N-MTF appointment type.)
- T-CON* (a TCON that needs to be answered. This non-searchable appointment type must be added to an individual provider's Provider Profile and the provider must be a User in the User file before telephone consults may be entered for the specified provider.)

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The following clinics are recommended as specialty clinics, whether self-referral or provider referred. Use SPEC appointment type.
 - Allergy
 - Community Health
 - Family Advocacy
 - Mental Health
 - Nutrition
 - Occupational Health
 - Orthopedics

APPOINTMENT STANDARDIZATION

Appointment Type Operational Definitions

- The following clinics are all specialty clinics, whether self-referral or provider referred (cont)
 - Optometry
 - Physical Therapy
 - Psychology
 - Psychiatry
 - Social Work
 - Substance Abuse

APPOINTMENT STANDARDIZATION

COFFEE BREAK

APPOINTMENT STANDARDIZATION

DETAIL CODES

APPOINTMENT STANDARDIZATION

Detail Codes - What are they?

- Detail codes are used to control patient access to an appointment slot or to reserve resources for the appointment, i.e., the right patient to the right provider in the right place
- Types of detail codes
 - clinical resource (procedures and evaluations)
 - age
 - patient gender
 - web appointing
 - other
 - patient access type

APPOINTMENT STANDARDIZATION

Detail Codes - What are they?

- Clinics will only use the detail codes that apply to them. All detail codes are optional.
- Sites should determine whether care should be defined by an existing/new hospital location or by a detail code.
- Generally used for special clinical care required on an interim basis.
- Used to schedule a particular type of care in a multi-specialty setting, e.g. OB or GYN

APPOINTMENT STANDARDIZATION

Examples of Detail Codes

- Asthma Asthma evaluation or education appointments
- BEPC Birth and Early Parenting Class
- BFC Breast Feeding Class
- BK Back Pain or Problem
- BTL Bilateral Tubal Ligation
- Chol Cholesterol
- Circ Circumcision
- Colpo Colposcopy—abnormal pap required
- DM Diabetes
- EDU Education
- MEB Evaluation Board Physical Exam
- NO No
- REM Removal
- See Appx M, *Commander's Guide to Access Success*

APPOINTMENT STANDARDIZATION

Detail Codes Utilization

- In APS II clerks will be able to search for appointments using the detail codes
- Until the APS II enhancements to CHCS are installed, sites may enter detail codes as free text into the appointment slot comment field where the booking clerk may view the comment when selecting an appointment
- Sites may recommend detail codes with approval by their Lead Agent POC and coordination with TMA.

APPOINTMENT STANDARDIZATION

Detail Codes - Clinical Resources

- Used to identify resources that must be reserved or procedures that must be performed for the appointment such as equipment or staff, e.g., Anger, PAP, Flight Physical Exam, Physical Exam, Asthma, Diabetes, etc.
- The clinical detail codes are intended primarily for specialty care and wellness care but have applications in Primary Care
- Approximately 150 - 200 detail codes, ca. 50 are procedures

APPOINTMENT STANDARDIZATION

Clinical Resource Detail Codes - What are they?

- Procedures
- Support Readiness
- Education/Classes
- Evaluation/Assessments
- Counseling
- Equipment Reservation
- Care that requires an unusual duration.
- Provider Professional Category - temporary

APPOINTMENT STANDARDIZATION

Clinical Resource Detail Codes - What they are Not

- A place of care. Detail codes should not duplicate existing clinic names (hospital locations) at the MTF.
- Appointment type
- Provider specialty
- Provider group
- Diagnosis
- Standard care that can be rendered in a normal appointment without special resources

APPOINTMENT STANDARDIZATION

Detail Codes - Age Codes

- Used to indicate the appropriate age of the patient for the appointment
- Age codes should be created by the sites in the Detail Code file and must adhere to the following formatting standards in the form of an age range: 0-12, 65-120, 3M-6M, 1W-3W, 1D-3D, etc.
- “M” indicates age in months. “D” indicates age in days. “W” indicates age in weeks. The number alone indicates age in years
- The low and high numbers are inclusive and the lower age precedes the upper age limit
- Age codes do not require approval from the Lead Agent or TMA.

APPOINTMENT STANDARDIZATION

Detail Codes - Patient Gender Codes

- Patient gender codes ensure that appointments that are inappropriate for a gender are not assigned to that type of patient. These codes are important for web-based appointing.

FE - Female

MA - Male

APPOINTMENT STANDARDIZATION

Detail Codes - Web Appointing

- Two web appointing models are currently supported. One may go away.
 - WEA - A site marks all the appointments that are available to the web for the patient to book. Appointments without the WEA will not be offered to the patient to book.
 - WEX - The site opens all Primary Care appointments for web booking except those with a WEX detail code. Appointments with a WEX will not be offered to the patient to book.

APPOINTMENT STANDARDIZATION

Detail Codes - RPD

- The Readiness Post-Deployment (RPD) detail code is designated for patients who are seeking care for potentially deployment related experiences/exposures and for patients who are experiencing health concerns which they relate to a deployment....
- RPD appointments should follow an initial PCM evaluation.
- Should be a 30 minute appointment.
- May be booked as ACUT, ROUT, or WELL appointment types.
- Included RPRE also, Readiness Pre-Deployment

APPOINTMENT STANDARDIZATION

Detail Codes - Other

- Medicare
- Medical Evaluation Board
- Actions - Removal, No (Combined with other detail codes)
- Other code combinations

APPOINTMENT STANDARDIZATION

Requesting New Detail Codes

- Sites may create new detail codes provided they are approved by the Lead Agent APS POC.
- Lead Agent POCs from all Regions will coordinate new detail codes with the TMA Appointment Standardization Program Manager.
- New detail codes approved by the Lead Agent POCs and TMA will be used throughout the region and MHS.
- Approved detail codes will be published on the TRICARE Access Imperatives web page in the Commander's Guide to Access Success .

APPOINTMENT STANDARDIZATION

Requesting New Detail Codes

- Detail codes will be reviewed by the ASIPT on a bi-weekly basis. Once approved, sites may add them to their Detail Code file and use them immediately.
- Detail codes will be released in CHCS on a monthly basis as they are approved.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- Patient Access Type codes are special detail codes. The standard patient access codes should be used to reserve appointments for beneficiaries to meet TRICARE or contract quotients.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- BPAD Active Duty Only
- BPPR Prime Only
- BPAP Active Duty and Prime
- BPGME Graduate Medical Education
- BPNAD No Active Duty
- BPNPR No Prime
- BPNAP No Active Duty, No Prime
- BPSP Special Programs Patients
- BPAPS Active Duty, Prime, and Special Programs
- BPTS TRICARE Standard/CHAMPUS

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- Active Duty (BPAD) – Uniformed Services Personnel (regardless of where or whether they are enrolled), guard and reserve on active duty, NATO, and other status of forces agreement active duty members are the only patients permitted to be booked for appointments reserved for this access type.

The intent of this type is to allow sites to ensure access for any Active Duty member to the MTF for care that is appropriate for that type of beneficiary.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- Prime (BPPR)— Family members of Uniformed Services Personnel, retirees, retiree family members, and TRICARE Senior Prime, who are enrolled in TRICARE to any local or remote MTF, are the only patients permitted to be booked for appointments reserved by this access type. The intent of this type is to allow sites to ensure access for any Non-Active Duty TRICARE Prime enrollee to care that is appropriate for that type of beneficiary. This group also includes enrollees with contractor PCMs. This group does not include NATO family members and enrollees to the Uniformed Services Family Health Plan (USFHP), except by specific authorization.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- Active Duty and Prime (BPAP)– This category includes Active Duty and Prime patients. Refer to above operational definitions for each category.
- Graduate Medical Education (BPGME)– Any interesting case designated by local directive as reserved for the training of Graduate Medical Education staff. The clinic will usually book appointments for these patients.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- No Active Duty (BPNAD) – TRICARE Standard, TRICARE Extra, Uniformed Services family members, retirees, retiree family members and TRICARE Senior Prime enrollees and other beneficiaries may be booked to this slot if they are not Active Duty. Uniformed Services Personnel (regardless of where or whether they are enrolled), guard and reserve on active duty, NATO family members, USFHP enrollees (except by specific authorization), Secretarial Designees, and other status of forces agreement active duty members may not be booked into this slot. This access type is intended to support the region's need to reserve slots for resource sharing providers whose contracts specify that they may not treat Active Duty.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- No Prime (BPNPR) – Non-Active Duty Prime enrollees from the local MTF or remote MTFs, contractor enrollees, and TRICARE Senior Prime may not be booked into this slot. Active Duty may also be booked to these appointments. All other beneficiaries, including Medicare patients, TRICARE Standard, NATO, NATO family members, Secretarial Designees, etc. may be booked to these appointments.

The intent of this access type is to reserve appointments for Medicare, Space A, and other special needs patients and to support the region's need to reserve slots for resource sharing providers whose contracts specify that they may not treat Prime patients.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- No Active Duty, No Prime (BP NAP) – TRICARE Standard, TRICARE Extra, Medicare, and other direct care only (Space A) beneficiaries may be booked to these appointments.

This access type is primarily designed to reserve appointments for “at risk” patients who are contractor reliant. Secondly, this type also supports the contract revised financing requirement to capture non-enrollees who would otherwise go downtown, i.e., Medicare and Space A.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- Special Programs Patients (BPSP)– Beneficiaries enrolled in special local programs may be booked to these appointments. This access type is designed to ensure that a site's special program access requirements can be met by appointing.
- Active Duty, Prime, and Special Programs (BPAPS)– This category includes Active Duty, Prime, and Special Programs Patients. Refer to above operational definitions for each category.

APPOINTMENT STANDARDIZATION

Patient Access Type Operational Definitions

- TRICARE Standard/CHAMPUS (BPTS) – Active Duty family members, retirees, and retiree family members who are entitled to CHAMPUS reimbursement for civilian care rendered.

This type supports the contract revised financing requirement to capture CHAMPUS non-enrollees who would otherwise go downtown.

APPOINTMENT STANDARDIZATION

Scenario - PCM Appointment

- Mrs. Snuffy, spouse of Lieutenant Snuffy, enrolled in TRICARE Prime (MTF) yesterday.
- She is not experiencing any acute health problems but wishes to "get established" with the MTF so she calls the TRICARE appointments line.
- The appointments clerk asks Mrs. Snuffy for the appropriate demographic information to establish her identity and enrollment status.

APPOINTMENT STANDARDIZATION

Scenario - PCM Appointment

- Upon seeing the appropriate demographic information (HCPC, Enrolled Clinic, PCM, etc) the appointments clerk confirms that Mrs. Snuffy is a TRICARE Prime Enrollee.
- The appointments clerk (1) Asks Mrs. Snuffy if this is the first time she has asked for an appointment with her PCM or (2) Notices by viewing previous appointments that Mrs. Snuffy has not had the initial health data collection visit with the PCM.

APPOINTMENT STANDARDIZATION

Scenario - PCM Appointment

- The appointments clerk asks Mrs. Snuffy if she has any acute health conditions that require that she see a doctor within 24 hours.
- Mrs. Snuffy replies that she does not.
- The appointments clerk schedules her for a PCM appointment.

APPOINTMENT STANDARDIZATION

Scenario - ROUT Appointment

- Mrs. Snuffy has been experiencing a pain in her shoulder joint area and decides to call the TRICARE Appointments Line to schedule a visit with her provider.
- The appointments clerk, in accordance with local guidelines or scripts, determines the patient's needs and may transfer Mrs. Snuffy's call to the Triage Nurse if Nurse Triage is available.

APPOINTMENT STANDARDIZATION

Scenario - ROUT Appointment

- Using approved protocols, the clerk or nurse rules out self-care and determines that an acute appointment isn't necessary, and that a routine appointment should be scheduled with Mrs. Snuffy's provider within 7 days.
- Using the Order of Precedence for Appointments Search business rule or local protocols, the clerk or Triage Nurse books the appointment and gives the patient appropriate instruction.

APPOINTMENT STANDARDIZATION

Scenario - SPEC Appointment

- Mrs. Snuffy's PCM (Dr. Smith) notices some abnormalities in a routine office visit. Dr. Smith is extremely concerned about Mrs. Snuffy's examination and judges that an examination beyond the capability of a PCM is necessary.
- Dr. Smith sends a specific scheduled consult order to the Health Care Finder using the STAT priority.

APPOINTMENT STANDARDIZATION

Scenario - SPEC Appointment

- Dr. Smith also calls Dr. Bones, the Specialist, and discusses Mrs. Snuffy's case. The two agree that Mrs. Snuffy needs to be seen immediately.
- The CHCS Consult Order is reviewed and designated for an appointment specifically with Dr. Bones.
- As a result of the consultation between Dr. Bones and Dr. Smith the referral priority is changed to a 48HRS priority, i.e., a referral within 2 days.

APPOINTMENT STANDARDIZATION

Scenario - SPEC Appointment

- Mrs. Snuffy is instructed to stop and see the front desk clerk on the way out to schedule the appointment.
- The clerk, who has access to Dr. Bones' schedule, pulls up the consult order on Mrs. Snuffy, understands the instructions in the consult order, and books an initial specialty care appointment with Dr. Bones within the 2 day timeframe specified.

APPOINTMENT STANDARDIZATION

Scenario - ACUT Appointment

- Mrs. Snuffy is experiencing flu-like symptoms and feels that she is in need of prescription medication.
- She calls the TRICARE Appointments line and explains that she needs an appointment to see a health care provider right away. She will be referred to nurse triage as appropriate.
- If Mrs. Snuffy, as a TRICARE Prime enrollee, reasonably feels, as a prudent lay person, that her condition needs attention within 24 hours, every effort will be made to ensure she receives an appointment consistent with the Order of Precedence for Appointments Search business rule or local policy.

APPOINTMENT STANDARDIZATION

Scenario - ACUT Appointment

- If not an emergency, the appointments clerk pulls up Mrs. Snuffy's demographic information and verifies her eligibility and TRICARE enrollment status.
- The clerk verifies that Mrs. Snuffy is seeking an immediate visit with her PCM to get treatment for flu-like symptoms.
- The clerk may or may not transfer Mrs. Snuffy's call to a triage nurse. Using appropriately approved protocols, the clerk or nurse determines whether Mrs. Snuffy (1) needs to have an office visit within 24 hours, (2) can wait for a "Routine" or "Established" patient appointment, or (3) can benefit from health care information or self-help instruction from the nurse.

APPOINTMENT STANDARDIZATION

Scenario - ACUT Appointment

- If the clerk or triage nurse determines that Mrs. Snuffy does need to be seen by a health care provider within 24 hours, the clerk/nurse will have access to the PCM clinic appointment schedule and can book an appointment immediately.

APPOINTMENT STANDARDIZATION

Scenario - EST Appointment

- Mrs. Snuffy had been seen as an acute patient (using the ACUT) appointment type last week for a severe upper respiratory infection.
- She is instructed to get a follow-up appointment one week later to ensure that the antibiotics prescribed work effectively.
- The PCM may use a Consult Order to provide instructions which will be available for the appointments clerk to properly book Mrs. Snuffy's follow-up appointment.

APPOINTMENT STANDARDIZATION

Scenario - EST Appointment

- One Alternative: The patient calls central appointments giving the clerk the appropriate information for accessing AOP in order to find the reviewed order and book the appointment.
- Better Alternative: The simple, user friendly method would be for the patient to simply relay the physician's instructions for a follow-up appointment next week to the front desk clerk who will book the patient's appointments using the EST appointment type before she leaves the clinic.

APPOINTMENT STANDARDIZATION

Scenario - WELL Appointment

- Mrs. Snuffy calls the TRICARE appointments line to ask for an appointment for her periodic physical examination.
- The appointments clerk pulls up the appropriate screen with Mrs. Snuffy's demographic information and enrollment status.
- The clerk does a search keyed on the WELLNESS ATC category (other appropriate identifiers may also be used for the search; e.g., PCM, detail field information, Well appointment type, etc.) and finds the next available WELL appointment slot. The clerk books the appointment for the patient.

APPOINTMENT STANDARDIZATION

Scenario - PROC Appointment

- SGT Snuffy had been referred to Gastroenterology.
- The Gastroenterologist decides that Snuffy needs to come back in one week for an Upper GI examination which will be performed in the clinic.
- Alternative 1 - (No scheduling personnel within clinic) The physician enters a consult order into the system for the procedure to be performed. Instructions to be given to SGT Snuffy are included on the consult order. SGT Snuffy is instructed to call the central appointments line and inform them he has a consult for a procedure to be scheduled (or the appointments clerk calls SGT Snuffy).

APPOINTMENT STANDARDIZATION

Scenario - PROC Appointment

- The appointments clerk is able to open AOP and select the consult order (review marked - "appoint to MTF") to schedule an appointment for SGT Snuffy to have the procedure performed. The appointments clerk uses the information on the consult order to remind SGT Snuffy of the physician's instructions on how to be prepared for the procedure.
- Alternative 2 (more desirable) - SGT Snuffy is able to stop by the front desk of the clinic and get his appointments scheduled before he leaves the clinic.

What Do They Look Like ?

APPOINTMENT STANDARDIZATION Template/Schedule Build

■ **New Fields/New Rules**

- *Slot Duration*: The duration will default from the appointment type duration in the Provider Profile. The scheduling clerk may correct the duration.
- *Workload Type*: The workload type will always be non-count for non-count clinics. For count clinics, the workload type will default from the appointment type's workload type in the Provider Profile. The scheduling clerk may correct the workload type.

APPOINTMENT STANDARDIZATION

Template/Schedule Build

■ **New Fields/New Rules (continued)**

- *Detail Codes*: MTFs may assign up to 3 standard detail codes to each appointment slot. Check site guidelines for order of detail codes.

■ ***Changed Field***

- *Slot comment*: The slot comment is a free text field lengthened to 50 characters.
- The slot comment will no longer appear on the appointment display screen but may be viewed by pressing F9 when selecting an appointment to book.

APPOINTMENT STANDARDIZATION Template/Schedule Build

- During the build function, user may view the template or schedule together with the slot comments.
- Batch update function allows user to build multiple slots all with the same characteristics.

APPOINTMENT STANDARDIZATION NON-COUNT APPOINTMENTS

- Workload type for non-count clinic will always be non-count for all appointments to that clinic. The workload type may not be changed.
- Workload type for a count clinic will default on the appointment slot from the appointment type in the Provider's Profile. The scheduling clerk may correct the value on the appointment slot to non-count.

APPOINTMENT STANDARDIZATION

Booking - Enhancements

- The Detail Code is a new search criteria.
- Detail codes display on the available Appointment List in place of the slot comment.
- The slot comment must now be viewed by selecting an appointment and pressing F9.
- Detail codes will indicate to the clerk any restrictions on the appointment and should be consulted carefully.
- Clerk may search for specific types of care using up to 3 detail codes
- In order to appear on the Appointment Display screen, an appointment must contain all the detail codes selected.

APPOINTMENT STANDARDIZATION Booking - Enhancements

- Clerk has the option to not select a detail code. CHCS will display all the appointment slots with their detail codes. Clerk can review and select the appropriate appointment based on the detail codes displayed.
- CHCS performs no edits based on the detail codes, e.g., will not prevent a male from being booked to a female appointment (yet). Clerk must be alert.
- Clerk has the option to correct the appointment data before filing the appointment, including appointment type and detail codes. Clerk must enter a free text change reason. Slot data remains unchanged.

APPOINTMENT STANDARDIZATION

Booking - Guidelines

- When selecting appointments to book, attempt to select the following appointment types for the corresponding Access to Care (ATC) category to maintain consistency. Correct appointment type as necessary.

ATC Category		Appt Type
ACUTE	→	ACUT
ROUTINE	ROUT →	
WELLNESS	→ PCM	
WELLNESS	→ WELL	
SPECIALTY	SPEC →	
FUTURE	EST PROC	
GRP	→	{

APPOINTMENT STANDARDIZATION Booking - Guidelines

- The more search criteria selected, the longer the search will take.
- Detail codes may be the only means to find specific types of care, for example slots reserved for specific types of beneficiary (Medicare) , clinical care (pulmonary function test) or MEB appointments.
- If no detail codes are assigned to an appointment, anyone may be booked to the appointment.

APPOINTMENT STANDARDIZATION

■ **Note**

- Walk-in and Sick Call appointments will default to the Clinic or Provider's workload type.
- For count clinics, clerks will change the workload type on an appointment to non-count in End of Day Processing as necessary.

APPOINTMENT STANDARDIZATION

How to Set Up the
New Tools

APPOINTMENT STANDARDIZATION

Site Preparation - Conversion

- The APS II conversion will be run at installation to convert Templates and Schedules to: (1) set up new Workload Types and (2) move Detail Codes from the slot comment field to the new Detail Code fields.
 - Workload Type - mandatory
 - Detail Codes from the Slot Comment - optional
 - If elect to convert Detail Codes, only appointment slots with standard appointment types will be converted.

APPOINTMENT STANDARDIZATION

Site Preparation - Conversion

■ **Workload Type**

- Convert all Templates and only Schedules starting on the first of the month prior to the conversion, i.e., if conversion run 15 August, convert schedules beginning 1 July.
- Fill in Workload Type data in the appointment slot
- Appointment slots for all Non-Count clinics will always be non-count
- Appointment slots for Count clinics will default from the appointment type in the Provider Profile - similar to current functionality

APPOINTMENT STANDARDIZATION

Site Preparation - Conversion

■ Detail Codes

- Convert all Templates and only Schedules starting on the first of the month prior to the conversion, i.e., if conversion run 15 August, convert schedules beginning 1 July.
- Extract up to 3 Detail Codes from the Slot Comment and insert into new Detail Code fields, *provided the codes are in the Detail Code file*
- Slot comment text will contain only text that was not converted

APPOINTMENT STANDARDIZATION

Site Preparation - Conversion

- Detail code conversion is case sensitive. Sites should review slot comments to make sure detail codes are properly coded.
- Detail Codes must be delimited by a semicolon except the last entry, I.e., BPAD;0-12
- Make sure that any text delimited by a semicolon that resembles a Detail Code is not in the slot comment field, e.g., user initials
- **Important: Make sure age codes are entered in the Detail Code file prior to the conversion. WEA and WEX should already be there.**

APPOINTMENT STANDARDIZATION

Site Preparation - File and Table

- Immediately following installation of APS II, sites must set the *Medical Appointment Type* to YES in the Appointment Type file for non-standard appointment types. Otherwise those appointment types can not be used to build templates/schedules.
- Each clinic should set up their clinic-defined help list of detail codes in the Clinic Profile.
- Detail codes are case sensitive. Match the case.

APPOINTMENT STANDARDIZATION

Site Preparation - File and Table

- Self-Referral clinics should set the *Self-Referrals Allowed* flag to YES in the Clinic Profile and populate the clinic specialty field.
- Some examples of self-referral clinics are Optometry, PAP, Audiology, Mammography, Physical Exams, Immunizations, Psychiatry, Occupational Health, Dental. This depends on the site.

APPOINTMENT STANDARDIZATION

Site Preparation - File and Table

- Otherwise Clinic or Provider Profiles work as they always have. Both Profiles should be updated with the standard appointment types.

APPOINTMENT STANDARDIZATION

Site Preparation - Schedules

- Primary Care Templates and Schedules that have not already been converted to the standard appointment types and detail codes should be converted if your TRICARE contract is ready to go.
- Convert Specialty Templates and Schedules only if TRICARE contract is ready to go.
- Short Term: Update slot comments in Templates and Schedules with the one or several detail codes as free text delimited by semicolons.
- Long Term: Enter Detail Codes in Templates and Schedules

APPOINTMENT STANDARDIZATION

Site Preparation - Workload Type

- When sites have an issue related to count or non-count workload, they first need to consult their local MEPRS and ADS experts for guidance.

APPOINTMENT STANDARDIZATION

Site Preparation - Dental

- Some sites will not convert to the new nine appointment types for dental and ancillary care. They may be allowed to book using PAS as a secondary menu option with their own appointment types.
- Other sites are booking dental appointments using the MCP Referral Booking module with the nine standard appointment types. They are creating referrals for each appointment as required. These sites will be able to track access standards for dental care.

APPOINTMENT STANDARDIZATION

Site Preparation - Security

- Assign the SD APPT STAND security key to those who will add new appointment types and detail codes.
- Assign SD WK LOAD security key to those will be permitted to update the Workload Type in Templates, Schedules, and Booking functions
- Define a security key in the Appointment Change Authority screen in the Clinic and Provider Profiles to allow the user to correct appointment types and/or detail codes on a booked appointment.

APPOINTMENT STANDARDIZATION

Site Preparation - Security

- Assign the SD APPT STAND security key in the Provider Profile to those scheduling supervisors who will enter detail codes in the medical Clinic Profiles
- Assign SD WK LOAD security key in the Provider Profile to those responsible for the Workload Type

APPOINTMENT STANDARDIZATION

REGIONAL AND LOCAL STAFF ROLES

- The Lead Agent will be responsible for coordinating site-defined detail codes across the region.
- The Lead Agent will monitor the use of all standard data elements, and of standard and recommended clinic names. Clinic names that are not included in the standard or recommended name sets should be standardized at the regional level as much as possible.
- An Access Standards Manager should be assigned to manage appointing standards at the MTF level.

APPOINTMENT STANDARDIZATION

Where to go for information

- TRICARE Access Imperatives Web Site
 - <http://tricare.osd.mil/tai>
 - *Commander's Guide for Access Success*
 - » Suggested implementation steps
 - » Code operational definitions
 - Under Software Enhancements, see:
 - » APS I PR&DD Document
 - » APS II PR&DD Document

APPOINTMENT STANDARDIZATION CBT Training

- An MCP Advanced Computer Based Training (CBT) course has been prepared by the government
- An APS II Enhancements Upgrade is in the queue.
- The CBT will be available on the web and on CD ROM.
- The CBT will demonstrate how to book appointments in the MCP Healthcare Finder module and to build schedules and templates.

APPOINTMENT STANDARDIZATION QUESTIONS

QUESTIONS ???

APPOINTMENT STANDARDIZATION Benefits of the Approach

- Ability to track patient access at the clinic level
- Searches pull up more available appointments
- Improved patient access and satisfaction
- Less patient confusion
- Less variation between clinics and MTFs on coding of appointments
- Easier to learn and train

APPOINTMENT STANDARDIZATION Benefits of the Approach

- Enhanced ability to consistently code and analyze care scheduled and provided
- Appointment types for a provider are no longer locked to a count or a non-count value
- No longer need to create special non-count clinics within the count clinic
- Historical appointment data is correct and not impacted by Clinic or Provider Profile changes.

APPOINTMENT STANDARDIZATION Benefits of the Approach

- Easier, more accurate, and more flexible template and schedule build
- Easier Ad Hoc reporting capabilities. Don't have to consult the Clinic or Provider Profile to determine the workload value of the slot or kept appointment.
- Satisfies many of the GAO concerns
